

Introduction to the Hub in ECW 11

Choosing a patient using the search engine opens to the Hub for that patient.

The Hub offers both information about the patient as well as many navigation options to other areas of ECW 11.

The right panel provides access to the problem list and medication list, as well allergy and immunization information (in the Overview tab); information about labs, diagnostic images, telephone encounters, referrals, and actions (in the DRTLA tab); and medical/surgical history, social history, and family history (in the History tab) – the right panel is discussed in another document and video.

Patient Hub (Pcaretest, Six)

The blue navigation toolbar across the top of the Hub offers quick access to labs and DI, as well as other areas of the chart. The “Share” button opens the P2P menu where new P2P documents can be started. The patient’s address, phone number, email, last appointment, billing information, and more is seen in this screen as well.

The bottom half of the screen offers more navigation options. The most useful buttons in my view are the options to make a new appointment and new telephone encounter, and to navigate to patient documents, encounters, progress notes, consult notes, and the Rx history.
